Notes:

1. Whole blood samples for DNA isolation were collected from dogs that were healthy at the time of sampling.
2. If you need a letter included with your shipment, please send a draft of the letter in an editable format that can be copied onto the duty laboratories letterhead.
3. For the recipient contact, please make sure the person you list will be available at the contact number you provide and can answer any import questions from customs and FedEx. Several duty labs reported in previous CTs, not supplying the correct name/number/e-mail or not replying to questions sent to recipient is the number one reason samples are delayed or never received.
